Probably not necessary. I am proceeding with information that you provided last weeks. Thanks for all your help.

Chris, attached is the FSP that you requested. Unfortunately, the information you are requesting to produce a GIS layer (raw data, GPS coordinates, excel spreadsheets, etc.) has not been provided to us at this stage in the RI/FS. This information would be provided to us in the RI/FS Report which probably won't be submitted to us according to the attached letter. The letter states that NORCO is not financially able to continue the remaining phases of the RI/FS. We will probably end up finishing the RI/FS with funding from the letters of credit securing the AOCs. Also, Kleinfelder has been ordered by the PRP to curtail RI/FS activities at the Site which means the contractor does not have the funding to gather the requested information and provide it to us. Can you, under OSC authority, require Kleinfelder to provide us with the GIS information or any other information you need? Let me know if this is helpful or if you need anything else.

Subject: Falcon Refinery - RIFS data

Rafael-

Great info that you were able to share in the data maps. Is the data that was used to make the maps that you sent available as raw data? What I would like to get is the ID pt, GPS coordinate, constituent, and result as in excel so that I can make it into a GIS layer. As well do you have the sampling plan that was developed so that I can get a complete list of analyte sampled for. I am only interested in the data from soil sampling. The intended use of the data is to ensure that soil that is excavated is properly characterized for disposal.

Thanks
